Re: Germain Honda Car Wash Awning
6715 Sawmill Rd, Dublin, OH

Attention Planning Staff,

Germain Honda would like to install a car wash in one of the service bays of a small outlet building behind their main facility on Sawmill. Because the car wash equipment is too long to fit inside of the existing building, the air dryer blowers for the car wash will be located on the exterior of the building just outside of an overhead door. An awning is being proposed to protect this equipment from the elements and to shield it from view.

Please accept the following documents for planning review:

1. Application for Development
2. Check for \$1,025 application fee
3. Minor Project Review Checklist
4. (10) 11x17 sets of drawings

Thank you for your time and consideration.
Respectfully,

David Kaldy
