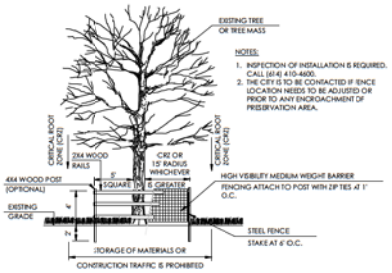
TREE PRESERVATION GENERAL NOTES

1. The owner shall be responsible for the construction, erection and maintenance of temporary fencing around tree preservation areas so that all protected trees shall be preserved. The fencing shall be located a distance from the trunk that equals, at a minimum, the distance of the critical root zone or 15 feet, whichever is greater. Where physical site constraints do not allow for such installation, tree protection locations and methods shall be determined on site, with the consultation of the City of Dublin Landscape Inspector. Call 410-4600 for tree fencing inspection.
2. Fencing shall remain in place and be secured in an upright position during the entire construction period to prevent the impingement of construction vehicles, materials, spoils, and equipment into or upon the tree preservation area.
3. Tree preservation signs, available from the Division of Land Use and Long Range Planning, must be located along the Fencing. Any change in protective fencing must be approved by the Director of Land Use and Long Range Planning.
4. The approved tree preservation plan shall be available on the building site before work commences and at all times during construction of the project. The owner shall be responsible for notifying all contractors and utilities.
5. During all phases of construction, all steps to prevent the destruction or damage to protected trees shall be taken. No construction activity, movement and/or placement of equipment, vehicles, materials or spoils storage shall be permitted within the tree preservation area. No excess soil, additional fill, liquids, or construction debris shall be placed within the critical root zone of all trees that are to be preserved.
6. No attachments, including but not limited to ropes, nails, advertising posters, signs, fences, or wires (other than those used for bracing, guying or wrapping) shall be attached to any tree.
7. No gaseous liquids or solid substances which are harmful to trees shall be permitted within the tree preservation area.
8. No fire or heat shall be permitted within the tree preservation area.
9. All utilities, including service lines, shall be installed in accordance with the tree preservation plan.



TREE PRESERVATION DETAIL
SCALE: NONE

LEGEND

– Limits of Grading (Trees to be Removed)

Tree Survey was prepared only for those areas anticipated for tree removal.

TREES TO BE REPLACED:

1 Tree (22 Inches) = Trees in Fair or Good condition greater than 18 inch being removed requiring replacement on inch-for-inch basis

21 Trees =Trees in Fair or Good condition between 6 inch and 18 inch being removed requiring replacement on tree for tree basis

Total Number of Trees to be Replaced = 30 Trees
(22 inches / 2.5 caliper inch (minimum tree size) plus 21 trees

TREES TO BE REMOVED (NOT SUBJECT TO TREE REMOVAL):

1243 Trees = Additional trees being removed either in poor or dead condition or between 6 inch and 18 inch per tree waiver

LEGEND
TBR = To Be Removed
TBR-R = To Be Removed and Replaced
