

Bridge Park – Dublin, Ohio

P&Z Submittal Summary of Changes

July 31, 2015

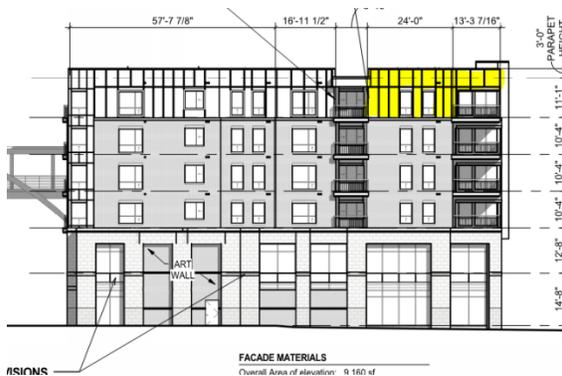

- Chicago
- Cleveland
- Covington
- Dallas
- Indianapolis
- Nashville
- Washington DC

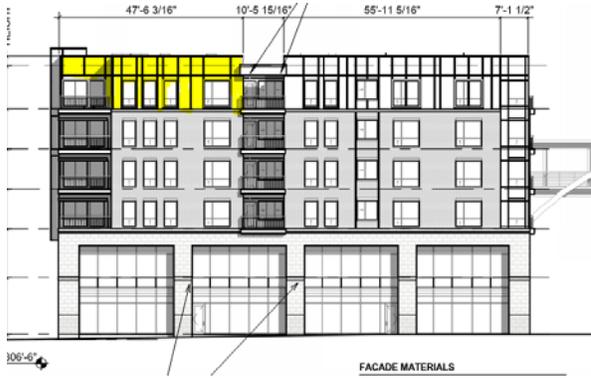

1) B1

- a) On the west façade the 2 vertical elements that once were 4 levels of fiber cement, have been switched to metal panel.

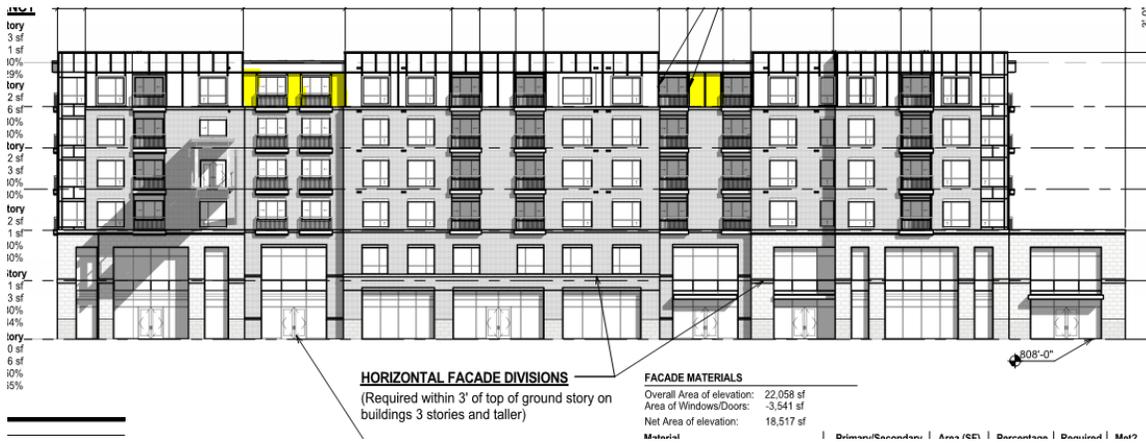

- b) Thin brick has replaced the cement board at level 6 on the two corner elements on the west side of the Building. The thin brick has been wrapped around to the south and north side of these elements at this level.

c) On the east side thin brick has been added at level 6 at the entry insets.

2) The only additional waiver is for the use of thin brick at level 6 due to Code requirements
