Minor Project Review (MPR)	Section 153.065(H) of the Zoning Code identifies requirements and regulations for signs in the Bridge Street District. Following is an analysis by Planning based on those regulations.
Proposal	Code permits the tenant one building mounted sign per street frontage (wall, window, awning, projecting signs). The applicant is proposing to install a wall-mounted sign above the main entrance of the tenant space at an unspecified height. The proposal is for a non-illuminated, pre-assembled high density urethane (HDU) sign panel that has an area of 8 square feet, which is the maximum size permitted in this location. The sign is proposed to be two colors (light blue with white letters), which meets the code requirement with respect to maximum number of colors.
