Overview

Vendor Self Service (VSS) provides vendors with web-based access to information stored in the City of Dublin's database. The information is drawn from multiple modules, including Accounts Payable, Purchasing, and Bid Management.

Using VSS, vendors can enter and maintain their contact and remittance information, discount and payment terms, designated contact persons, and a list of commodity codes that represent the goods and services the vendor can provide.

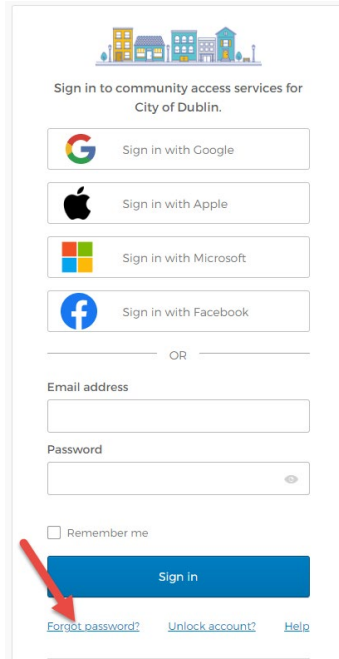

A listing of the vendor's current and prior 1099 data, purchase orders, invoices, contracts, and checks is also available in VSS.
