RE: Penzone's Main Office Brick Loxon Vertical Stain Application

Date 10/19/2023

Description : The Loxon Vertical stain is a product that Holderbaums Painting has used in the past on several Projects. The product is a preferred product for Holderbaums Painting because of the listed items below.

The material is a breathable, self-penetrating, and holds its color retention very well. We have not experienced any peeling, and or scaling of any sort. The application requires a light pressure to remove any loose debris before, if there is effloresce, loose mortar, and or loose bricks these items would be addressed prior to painting. The covering of all adjacent surfaces prior to application. The application requires an airless sprayer, block brushes, and 1" roller naps. The material is sprayed on and back rolled and or brushed depending upon the area to achieve even mills. Multiple coats 2-3 are applied until a clean uniform appearance is achieved.

We have not used the Loxon Vertical stain lately mainly because it was not available for a few year because of the Raw material shortage. The most recent projects we did Goodwill @ Buckeye Lake 10933 Hebron Rd Buckeye Lake, Ohio 43008 painted July of 2021 and Big Lots in Heath 851 S 30th St Heath Ohio 43056

Sincerely: Tim Holderbaum CEO
