Gordon Food Services & OSU Sign Relocations

Project Narrative

As part of the City of Dublin's Capital Improvements Program, a shared use path is planned to be installed on the west side of Dublin Center Drive from Stoneridge Lane to W. Dublin Granville Road (project number 22-023-CIP). This path will abut two parcels on the west side of Dublin Center Drive: 3900 Stoneridge Lane, and 3901 W. Dublin Granville Road. To construct the path, two signs on these parcels are proposed to be relocated. Due to issues of sign visibility, the locations for both proposed sign locations are within 8 feet of existing and proposed right of way. The proposed locations for the relocated signs were negotiated with the property owners. The new locations are close enough to remain visible for the businesses, and safely far from the proposed path and existing roadway. The proposed and existing sign locations are shown in the included sign relocation graphics. The existing signs will be relocated and the function and type of these signs will not be altered.
