

To whom it may concern,

On behalf of Shamrock Family Eye Care, SignAffects is requesting to remove the existing ground sign and replace it with a new sign including an updated modern design. The existing sign is outdated and faded from the weather.

The new sign will have a stone faced base which matches the brick pillars of the building located at 5151 Post Road. The double sided monument will display the same design on each side. The acrylic push-through letters will read, Shamrock Family Eye Care with a swoosh and clover above the text. The address numbers, 5151, will be featured on the base. The aluminum cabinet will be internally illuminated with LED lighting. Measuring 6 ft x 6 ft with a total square footage of 36. The height including the base is 6 feet, the cabinet itself is 4 feet.

The base will be properly mounted per COSA (Central Ohio Sign Association) standards. It will be placed on one 3"x3"x.025" steel posts into 3.5 deep concrete footer.

It will be erected in the same location as the current sign with the same set back, being 0 feet from the right-of-way. However, it is roughly 19 feet from the sidewalk facing Post Road.

We feel that installing a new sign will keep up with Dublin's contemporary look and follow suit with the surrounding businesses and neighborhood designs so that all is matching.

Thank you.
