RE: Muirfield Association Pool Renovation

The new pool equipment building being proposed is to make the process of keeping the pool clean safer for all involved, including the surrounding community. By building this new approximate 20' x 35' building to house all the pool equipment and chemicals, it removes the need to stretch a large hose over the creek and pedestrian path which is the only way to deliver the chemicals now. This also removes the equipment from the existing basement, which is safer for maintaining the equipment which helps ensure the pool stays clean. This new facility will be constructed in collaboration with the new pool which will replace the existing. The small building will match the existing buildings on site with color and materials being the same. This will be accessed from a new small drive to be used for pool equipment, chemicals, and maintenance.

We appreciate your consideration. Please do not hesitate to contact me should you have any questions.

Sincerely,

A handwritten signature in blue ink that reads "Beth Klapp".
