Features

Narrow, angular slots cut through a split elevation for a detailed, dramatic feel. Split ribs reveal the aggregate matrix for a randomly surfaced, hewn appearance.

Add relief and depth of texture to fields and bands; create visual anchoring to lower elevations or striking accent to top of walls.

Availability

Special order only. Configurations such as open ends and open end bond beams may be available. May be limited in plant location. Units can be made in any of our integral color options. Verify availability of corner units for your configurations.

Standards

Concrete masonry units manufactured by Angelus Block Co., Inc. meet ASTM C90 Standard Specification for Loadbearing Concrete Masonry Units.

Fire Rating

Solid grouted walls 8-in wide and greater are rated at 4 hours, per CBC Table 721.1(2). For partially grouted walls, depending on the specified weight classification, 8-inch wide units are 1 hour to 2 hours, and 12-inch wide units are 2 hours to 3 hours.

Sustainable Features

- This product is included in Type III Environmental Product Declarations for Angelus Block Concrete Masonry Units, specific to location and mix designs, and in one of six *Health Product Declarations*, as applicable for its weight classification.
- Contributes to green rating systems calculations, including Regional Materials, EPDs, and Material Ingredient Reporting.
- Angelus Block CMU help facilitate and support many more strategies and credits, including Optimize Energy Performance, Construction Waste Management, and several within Indoor Environmental Quality. Angelus Block CMU contain no VOCs.

See *Sustainable & Resilient Design: Angelus Block Products' Application to Rating Systems and Code* for detailed information. A copy is available from your representative, or as a download at www.AngelusBlock.com.

This is a low impact CarbonKind™ product which substantially reduces CO₂e. Learn more at Angelus Block/CarbonKind.

WARNING: This product can expose you to Silica, crystalline (airborne particles of respirable size) which is known to the State of California to cause cancer. For more information, go to www.P65Warnings.ca.gov.

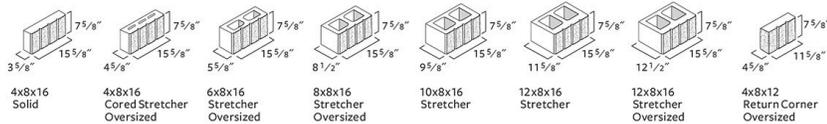

Split Rib

Split face technology reveals the bold and rugged texture while the ribbed appearance offers a more pronounced look.

Split Rib Block utilize the same technology as Split Face Block. Units are manufactured in 4, 6, or 8 rib configurations. Split Face technology reveals the bold and rugged texture of the natural aggregates used in their manufacture, while the ribbed appearance offers a more pronounced look. These units can be used by themselves or as accents along with Split Face, Ground Face or Polished Face blocks.
