

Council Candidate Q&A Transparency Posting

Posting No. 5

To ensure transparency and provide equal access to information for all candidates, the City is posting the following question received from a candidate, along with the City's response. This information is shared exactly as provided so that all candidates have the same access to City resources and clarification.

QUESTION SUBMITTED:

A resident expressed concern about increased traffic volume and vehicle speeds on a residential street that has become a common route for drivers traveling to and from a nearby commercial area. The resident noted safety worries due to children playing outside and school bus activity in the afternoons.

A question was asked whether the City could conduct a traffic volume study and consider speed management measures such as caution signage, crosswalk enhancements, or other visual traffic-calming improvements. Additionally, inquired about how to have the area added to the City's list for speed management review and potential mitigation tactics.

CITY RESPONSE:

*The City reviewed the concern through its **Speed Management Program**, which emphasizes data-driven, effective, and consistent safety strategies. Although the **Tactical Urbanism Pilot** was discontinued based on community feedback, the City remains focused on practical measures to enhance neighborhood safety.*

*Requests for "Children at Play" signs are common but no longer used, as research shows they do not impact driver behavior and may create a false sense of security. Instead, the City promotes evidence-based programs like **Slow Down Dublin**, which encourages safe driving through education and free awareness materials available at City Hall and the DCRC.*

A recent speed study has already been conducted and provided results.
