

# Llewellyn Farms Playground Renovation - Dublin, Ohio

Llewellyn Farms Park will receive an updated playground. The proposed design includes all new play equipment and surfacing for children ages 2-12. The new play area will include play structures with bridges, multi-use swings, slides and balance beams.

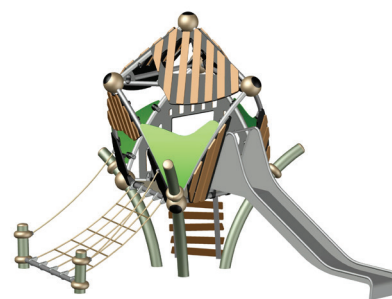

Project Site

**Trii Silver Lake Combo**

The Trii offers access in and out of the tree house by climbing a flexible ladder and sliding pole. A rope bridge leads to the Spaceball with a slide and climbing nets.

**Trii 1.14**

Designed especially for the youngest adventurers. The playhouse encourages first climbing experiences, providing a space for imaginative role-play.

**Swings**

Two traditional belt swings, a harness swing and a toddler swing are included.

**Orbit**

The Orbit.01 is a curvy balancing trail. Children love to balance and even adults will appreciate a quick balancing exercise.
