Re: Request for Additional Building Signage - Mount Carmel Dublin

Address: 4105 Emerald Parkway, Dublin, Ohio 43016

Mount Carmel Dublin is requesting approval for additional building signage to be reviewed by City staff and, upon staff consensus, submitted to the Planning and Zoning Commission for final consideration. The proposed signage consists of a blue “H” symbol to be installed on three sides of the existing hospital building, oriented to face west toward Emerald Parkway, south toward Interstate 270, and east toward Sawmill Road.

The purpose of the proposed signage is to utilize a community standard for hospital identification, the blue “H”, and provide visibility to the surrounding public roadways. Community feedback has indicated that Mount Carmel Dublin is not widely recognized as a full-service hospital. The facility provides comprehensive healthcare services, including a 24-hour emergency department, diagnostic services, interventional services, and inpatient care.

The additional signage is intended to enhance visibility, improve wayfinding, and increase public awareness of the hospital’s full range of services. Improved building identification will assist patients, visitors, and emergency responders in readily recognizing and accessing the facility, thereby supporting the hospital’s ability to effectively serve the surrounding community.
