

City of Dublin Request for Quote Concrete Sidewalk Shaving / Grinding

June 26, 2026

The City of Dublin respectfully requests a quote for concrete sidewalk shaving as described below. All quotes must be received by 4:00pm EST on **July 10, 2026** sent in form of a pdf to the contact information in Section G below.

A. Project Identification

The City of Dublin is seeking repairs to the sidewalks within the city by form of concrete sidewalk shaving or grinding at various locations shown in the [web map here](#).

B. Services Requested

The work shall include the shaving or grinding of concrete sidewalk trip hazards at the identified locations by the city. All trip hazards removed shall comply with the Federal Americans with Disabilities Act standards and shall include a warranty of work according to these standards.

Bids shall include references and photos of previous work. Contractors with previous work experience in sidewalk shaving or grinding with the City of Dublin need not submit references or photos.

Work will take place at approximately **426 identified addresses** with a measured **total number of cuts of 1,407** and a bid quantity of **5,991 linear feet**. Pricing shall be provided in a unit price format such that areas may be added or removed for better contract management. Shaving locations are identified by the web map and list in Attachment A.

The Engineer's Estimate for this work is \$74,000.

C. Scope of Work

The contractor will coordinate with the City regarding intended work days to avoid citywide events.

Advance Notification of Work: The Contractor shall coordinate with the project inspector at least two weeks in advance of initiating work in the identified areas.

Damage to Grass and Vegetated Areas: Grass or landscaped areas damaged by the Contractor shall be restored at the Contractor's expense to conditions that are equal to or better than

the existing conditions prior to commencement of work. Restoration shall be at the direction of the project inspector.

Utility Conflicts and Coordination: If the Contractor damages any utilities, they shall immediately notify the Utility Company and project inspector within 30 minutes of the damage. Any damage to existing utilities shall be repaired at the Contractor's expense.

Damage to Existing Irrigation System: If the Contractor damages any portion of an existing irrigation system, they shall immediately notify the Property Owner either through personal contact or leaving their contact information to the extent practicable. The Contractor shall also notify the project inspector within one hour of the damage. Any damage to existing irrigation systems shall be repaired at the Contractor's expense. These requirements also apply any invisible dog fencing systems.

Clean up: Should the integral vacuum system fail to collect all debris, the Contractor shall sweep the sidewalks thoroughly after the shaving / grinding operation. All debris collected shall be removed and disposed to a recycling location or to a location approved by the project inspector.

Measurements: Measurement is based on a liner foot of shaving / grinding regardless of the thickness of the sidewalk.

The bid shall be complete pricing including all mobilization, signage, and cleanup associated with the work. The quote shall encompass all necessary equipment, skilled labor, and required materials. The quote shall also include a general schedule of the work.

D. Equipment

Equipment must be able to shave or grind any size trip hazard from 1/4 inch and greater. Equipment must include a self-contained dust collection system, which is used 100% of the time. To ensure effectiveness and minimize machinery footprint, the system must consist of an engine-driven vacuum suction fan and dust collection tanks both mounted on the shaving or grinding apparatus. Electric vacuums, hoses, hand power tools extension cords and generators will not be permitted as they are not powerful enough to effectively contain OSHA recognized hazardous airborne silica dust generated by concrete shaving or grinding.

Shaving or grinding will be done dry without the use of water.

Equipment noise must be minimal so it does not disturb the public and the public will not need to wear hearing protection if located 10 ft. or further from the operation of the equipment. Per OSHA, hearing protection is required for individuals exposed to noise over 85 dB, as such the city requires that the equipment to perform the work must not exceed the 85 dB at 10 ft.

Inspection and acceptance of proposed equipment to be used on this project shall be performed by project inspector.

E. Attachments

Attachment A – general quantities for shaving at each location

F. Project Completion Time

The completion time for this project shall be no later than **November 30, 2026**.

G. Project Contact

For any questions, please contact:

Robert Taylor, P.E., Director – Asset Management & Quality Assurance
