Springtime Tips

Spring is the time to focus on these areas of your yard:

- **Cut back perennials (plants that are present year-round) and ornamental grasses such as Karl Foerster**
- **Remove any leaves that are left over from the fall**
- **Pull out any early emerging weeds**
- **Trim shrubs that do not flower in the spring—avoid pruning those that do flower in the spring such as Forsythia**
- **Edge flower beds, avoiding any tree roots that are on the surface**
- **Install a fresh layer of mulch on the flower beds no more than 2-4 inches deep—avoid a “volcano” shape piled around the tree trunk which can obstruct root growth**

Fertilizer Tips

More isn't always better. Many Dublin residents use up to 3x more fertilizer on lawns than is necessary or healthy. Using too much fertilizer is wasteful and can make lawn and local water unsafe for people, pets and children. Head to our website for some practical guidelines for healthy lawns and healthy families to maintain a beautiful lawn. Together, our efforts can keep it Greener in Dublin.
