

Bridge Park District – Minor Project Review
Building D1

Proposed Storefront Revisions
2-14-2020

Enclosed please find the supporting documents for our proposed changes to the storefront at Building D1 for Crawford Hoyings' new Leasing & Sales Office to be located at 6741 Longshore Street.

On the west side of the building, we are not proposing any changes to the structural openings. The proposed changes are limited to the storefront treatments.

On the east side of the building, we are not proposing any changes to the structural openings with the exception of the opening that is proposed to be the main entry for the tenant space. This is Storefront "B" and door #100. This entrance is recessed to maintain sidewalk clearance and to enhance the location of the entrance we are proposing an ACM panel system to run vertically at the opening and then run horizontally across the tenants storefront.

On all the storefronts we are proposing, they will maintain the original design intent of entire building. We are then proposing a field applied grid system be added to the storefronts at our clients location on both the east and west facades.

Please review the enclosed materials and let me know if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read 'Alison Crumley', with a large, stylized flourish extending to the right.

Alison Crumley, RA NCARB
