

Our intent with this project is to give the building a much needed facelift by replacing the siding and windows as well as adding cultural stone to part of the façade. From our research we have found that the original building was built in the 1940s and had 2 additions. We have tried to maintain the character of each of these by choosing different materials. We have chosen materials that are in keeping with those used on other buildings in the area. We hope that you agree with us that this minor project would be a major improvement.
