Can only say after eight days from actual paint.
El color de la pintura puede diferir de lo que se muestra en la muestra de la pintura en un momento de la pintura.

The Color Rendering Index (CRI) is an important factor in the color of the paint. The higher the CRI, the more accurately the paint will reproduce the colors of the objects it is applied to.

W and **W** are the respective values for the color rendering index (CRI) and the color rendering index (CRI) of the paint.
