# atlantis cabana

Adding a dramatic sense of style to any setting has never been easier. The Atlantis Cabana is an impressive combination of TUUCI's distinctive style and customary utility. Topped with a vector vent and flanked with ample drapes in high-performance marine-grade fabric, the Atlantis is built with an Armor-Wall™ aluminum marine alloy frame. It can be secured directly to a deck or in portable bases to create the perfect temporary or permanent outdoor room.

features:

a. Venice Aluminum Finial

b. Armor-Wall Mast

c. Reinforced Strut Joints

d. Aluminum Construction w/ Stainless Steel Components

e. Stainless Steel Curtain Rings, Grommets and Clips

f. Optional Pre-Wired Junction Box

TUUCI Equinox Cabana
Wind Rating

Letter from our President, Tom Parker:

TUUCI manufactures a variety of modular structures in our cabana line (Equinox, Atlantis, Grand Pacific, and Crescent). Each of these cabanas are durable and built for everyday use in commercial environments. Each of these products are modular and can be assembled and disassembled in minutes. Nothing on the structures is welded; the entire cabana can be disassembled quickly and easily. Curtains and fabric tops are designed to be removed with standard tools.

Because of the modular design, the cabanas are not "permanent structures" and therefore, are NOT subject to local building regulations, including wind load regulations. TUUCI's various cabana styles currently are in use by numerous properties around the state of Florida without being subject to building code regulations.

TUUCI has wind tested each of these products for structural integrity in high winds. The following are general wind ratings for standard products with <u>column mounts securely bolted to the ground</u>:

Equinox Cabana with trellis roof: 55 mph
Equinox Cabana with fabric roof: 50 mph
Crescent Cabana with fabric roof: 45 mph
Grand Pacific with fabric roof: 45 mph
Atlantis Cabana with fabric roof: 35 mph

If sustained winds are expected to exceed 35 mph, we strongly recommend that any fabric top, walls, or curtains be removed. The wind can be exceedingly difficult on fabric; certainly, it is best to remove and store all fabric items during heavy weather events.

If any contractors or building inspectors working on your property would like to discuss this issue with me, please do not hesitate to give them my contact information.

Thank you for your business.

Sincerely,

Thomas Parker
President and General Counsel

300W LED SHOEBOX AREA LIGHT

Wisdom
wisdom light,wisdom life,

## ■ Product Features

- High efficiency LED Driver, the wide range input voltage AC120-277V or AC277-480V；

- Lumileds LED high luminous efficiency and long life.

- Cast aluminium design, better cooling and easy replacement, light quality, LED Tj $<$ 85℃.

- Excellent optical design, greatly improve the light utilization and evenness.

- **Photocell Control and Motion Sensor Available (Option)**

LUMILEDS The Brighter Choice   **5 YEAR WARRANTY**   **DLC QPL LISTED 4.1**

■ Product Applications

WSD LED SHOEBOX AREA LIGHT series can be widely used in Urban roads, Industrial areas, Residential areas, Sidewalks, Parking lot, Schools, Gardens and etc.

■ Structure Features

- **Shell materials:** Aluminum & PC.
- **Finish: Dark Bronze/White**
