

RICHARD TAYLOR

ARCHITECTS

April 22, 2022

Project: new home at 181 S. High Street

Request: review and approval of exterior material selections

Previous ARB approvals include the overall design, exterior colors, and some exterior materials. In this application we're seeking approval of the last few exterior materials:

Exterior Lighting

- Gas Lanterns on the front porch and rear entry
- Electric lights at the garage overhead doors and garage service door

Porch Overlay

- Sandstone tile on front porch and rear entry porch

Garage Doors

- Door on south side of garage to change from an overhead door to a sliding "barn door". Look, style, and color remain the same
- Door on detached shed to change from solid door to anodized steel glass-panelled door. We're requesting this change to better accommodate the use of the shed for outdoor living purposes. Per the approved drawings, this door is being moved from the east side of the shed to the north side, where it cannot be seen from the street.
