Project Location---170 S Riverview St

Project Description...

Client Brief.....

The homeowner has completed many projects to upgrade her home over the years.

She contacted Oakland Design Associates to move her updates to the outdoor space.

The scope of the project includes the removal of the declining plant materials and walk, construction of a more interesting and inviting walk and a planting plan that will highlight and beautify the home.

Project Overview.....

Construction will begin with the removal of the existing plant materials and narrow concrete walk to the front porch.

A new 255 square foot, concrete paver walk will be constructed. The client has selected the Beacon Hill Smooth paver from Unilock in the color Fossil.

The project will finish up with the installation of new planting beds planted with a mix of deciduous and evergreen plantings.

Flowering trees and perennials will balance out the design and add seasonal color.
